

CAMPER TRAILER TENTS

There is something magical about pulling your camper into place at your favourite beachside spot, setting up and relaxing with the world going by around you. Camper trailers are the ideal 'best of both worlds' between camping and caravanning. With setup being quicker than most tents or caravans, and the ability to have a whole host of modern conveniences built into your trailer – on that front it is a true all-rounder. But, there is something that a lot of people also forget, you can get your camper to a lot more places than most caravans will ever see. Being lighter and smaller to tow, these campers will go almost anywhere.

CAMPER TRAILER TENTS

OZtrail is the most recognisable name in Aussie camping and we have a camper trailer for every need and every budget. Designed for quick and easy set up and pack down, you just hitch up and take off! Our camper trailer tents are packed with features to make camping more enjoyable and are designed and engineered to last the distance. We've been building and testing our camper trailer tents for long enough to understand what makes a truly great camper.

During the development of OZtrail's campers, we worked with Australia's premier canvas makers to incorporate decades of experience and knowledge in the manufacture of durable, weather resistant canvas camper trailers. Our commitment to continual improvement means that our campers are always getting better too!

The OZtrail Camper Trailer Tents include the following features:

✓ SatProof™ 600+ Ripstop Canvas Walls

Insulating, high strength, waterproof walls keep you comfortable & dry inside. Waterproofing & anti-mould compounds are saturated (not just coated) into the fabric of the poly-cotton canvas for superior performance and durability.

✓ SatProof™ 800+ Canvas Roof

Three layers of protection from the harsh Aussie sun! OZtrail pioneered this material – protective silver compounds are impregnated into the structure of the canvas in a unique process using heat and pressure rollers to give far superior performance compared to a simple surface coating.

✓ Insulcell Insulated Roof

Another OZtrail innovation combining a layer of insulation between an outer layer of SatProof™ 800+ Silver Impregnated Canvas and an inner layer of SatProof™ 600+ Ripstop Canvas for the ultimate in sun and heat protection.

✓ Invisible PVC Bucket Floor

Revolutionary design protects the heavy duty PVC floor material from the sun & wear, while reducing the change of water seepage. Seams are located high, well above any ponding or flowing water.

✓ High Tensile Hot Dipped Galvanised Tent Frame

Carefully designed with minimum joins in the steel roof pole frame for maximum strength & structural integrity. Corner cross-bracing further increases rigidity.

✓ One-Touch Pole Adjustment

Adjust the roof height quickly & easily assisted by our unique cam lock system.

✓ Heavy Duty Bed Base & Steel Sub-Frame

Water resistant Laminated Marine Ply mounted on heavy gauge box section galvanised sub-frame engineered for on & off-road conditions. Convenient gas strut-assisted access to the trailer. Trap door access to your gear & venting to reduce condensation under the mattress.

✓ High Quality Fine Insect Mesh

Sandfly proof, ultra-fine No-See-Um mesh keeps the biting insects outside where they belong.

✓ DuoDoor™ for easy single zip access to the camper

Solid & mesh doors can be opened independently for privacy or ventilation – inspired design means that you can always get in or out just by opening a single #10 zip.

✓ High Density Foam Mattress with Wall-mounted Mattress Guard

Sleep in comfort on a supremely comfy mattress. Wall-mounted PVC Mattress Guard keeps bedding dry from condensation. Removable, zipoff washable cover for easy care.

✓ Zipper Storm Flaps

All external zippers are further protected from wind & water by integrated storm flaps to keep the elements at bay.

✓ All-Weather Ventilation

Gusseted window awning on bedroom allows ventilation in all weather. Adjustable steel poles are provided for an instant gusseted window hood. Gussets can be removed if desired so the awning can roll back fully.

✓ Dual Access Window Panels

Great ventilation is assured in all conditions as strategic windows can be opened or closed from inside the camper.

✓ Removable clear PVC Window lights up the camper – keeps elements out

When it's cold & windy mount the removable clear PVC window to let more light in.

✓ Rolled Waterlock Roof-to-Wall Seams

Greater weather protection and water runoff as rain is unable to penetrate thanks to precise engineering of the roof-to-wall junction structure and position.

✓ Easy Access – Dual Tilt Equipped with Safety Ladder

Gas Strut System allows quick and easy access from inside to the trailer by tilting either the under-mattress door or the entire camper top for access to large items. Lightweight aluminium ladder for access to the bed with comfortable contoured non-slip treads.

✓ All Mounting Hardware provided

Mounting blocks, lockable latches, hinges & bolts are all included. All you need is your trailer and some dust seal.

✓ Quality Materials & Attention to Detail

We use quality, tough #8 zips for windows and #10 zips for doors for long life and ease of use. All peg points are reinforced & feature stainless steel D rings - main points are sand peg compatible. Thoughtful touches like lantern loops for lights and accessories, easy clean bedroom floor surface and the option of pole placement to ensure unobstructed door access.

✓ Intelligent Design – our Experience shines through

Door close to the bed, fully sheltered by the awning so it can be left open in harsh weather. Extra-high roof for more headroom, a spacious feeling & great Summer cooling. Awning zips off so you can set up in under 5 minutes if necessary!

✓ Rear Room Kits for the Best of Both Worlds

OZtrail's new Rear Room kits allow you the freedom of a versatile camper that can be set up or packed away in 5 minutes or you can utilise the extra space and have a huge multi-room home away from home! Includes roof, frame, walls & floors to create a huge multi-room camper.

✓ Full Removable Privacy Screen for Bedroom

Full insect proof canvas wall with mesh door keeps insects out during the day when the living area is open – adds to bedroom privacy too.

✓ Draft Block™ System lets you add a Walls & Floor to make a sunroom

Engineered to let you add an optional (at extra cost) sunroom under the camper awning, Draft Block™ ensures all gaps are sealed with canvas panels securely joined with Velcro® so that insects and the elements are kept out. A tailored tailgate cover is included to hide the trailer and seal all gaps around the trailer. The optional sunroom matches the quality of your camper trailer with its PVC floor, SatProof™ walls and large insect proof windows screened with No-See-Um mesh.

✓ Built to go the Distance

Dust covers are made from heavy duty reinforced PVC, heavy duty #10 coil zips with dust flaps that secure in position with Velcro®. OZtrail dust covers are designed for optimum performance in extreme conditions. Anti-ponding straps tension the cover to reduce water ponding when parked and help reduce ballooning during towing.

*Not all features available / standard on all models. Please refer to page 76 for full specification details.

CAMPER 6 CCT-06-F

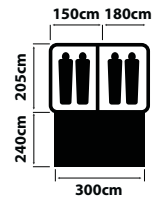

100kg

220cm

209 x 153 x 19cm
